Leishmania amazonensis promastigotes treated with bovine serum albumin and the proteinase inhibitors aprotinin, pepstatin, and captopril in low ionic strength buffers cause lysis of their own membrane. Proteinase inhibitors reduce the release of nonvital lipid-soluble chromogens and also inhibit the hemolytic activity of the proteases released upon treatment of erythrocytes with the intact promastigotes. Results suggest that proteinase inhibitors may act by inhibiting the release of lysosomal enzymes and the formation of an insoluble complex between the parasite and erythrocyte membrane, preventing damage to the erythrocyte. These findings extend the possibilities of using proteinase inhibitors as a potential therapeutic intervention for leishmaniasis.Billabong Beach Billabong Beach is a sea beach located on the south side of Seal Beach, California, United States, adjacent to the Seal Beach Dunes. It is the location of the Billabong Beanery, which is primarily a coffeehouse and cafe. Billabong is the name of the urchin which is found on the beach, although this is not particularly common. Since 1993, the Billabong Surfing Championship has been held annually at the beach.
