Elden Ring is a new fantasy action RPG. Description Summon the power of the Elden Ring and become the Imperial Champion. Explore the Lands Between, and form a party of heroes to take on the enemies. We are a publisher, developer, and a company that has been working hard to offer a unique game to the PlayStation 4 users. We realize it is our obligation to create games with a high level of quality and entertain the players, so Elden Ring is an action RPG that combines both features. Development of Elden Ring We are a company that started as a multiplayer RPG where we just needed to create unique world and characters. We have both the "old" and "new" way of thinking about our games. We started from the idea of "what if we are creating a different game," and what if we are launching a new action RPG? We use the "old" way of thinking because we want to create a game that everyone wants to play and we try to make a different game from what everyone is playing. We use the "new" way of thinking because we want to create a new game that is unique and meets the desires of our fans. We focus on our games and try to create a game that everyone wants to play. Since we have fans around the world, we are always looking at the feedback that we received from the players. We decided to use this feedback and try to create games that everyone wants to play. From that, we are able to plan our next steps for the development of our games. Graphics Graphics, as it is considered to be the ultimate goal of our games, is one of the main factors that we focus on. Graphics are the most important factor for both the users and for us, and we are always trying to improve on the quality of the graphics as well as the overall quality of the product. We try to not just create images that look real but also have realistic characters. From the ground design, to the overall environment, our goal is to create a beautiful world that has aesthetic values. Just like other action RPGs, Elden Ring is an epic and massive RPG, where you can see many things that you can't see in other RPGs, like huge and beautiful environments, and characters that are mostly drawn with much detail. Since we are creating an action RPG that introduces a new and challenging gameplay to the players
